· **Appropriate engineering controls** No further data; see item 7.

· **Individual protection measures, such as personal protective equipment**

· **General protective and hygienic measures:**

The usual precautionary measures are to be adhered to when handling chemicals.

The design of body protection equipment must be selected specifically for the workplace, depending on the concentration and quantity of hazardous substances.

· **Respiratory protection:**

Not necessary when used as intended. Ventilate work area well. Respiratory protection is required in case of

of dusts/vapours/aerosols as well as increased concentration in the air (filter class according to DIN EN 141). Observe wearing time limitations.

· **Hand protection**

As a rule, one does not come into direct contact with the product during use.

Protective gloves must not be worn if there is a risk of the protective glove being drawn into rotating or linearly moving machine parts.

Recommendation for short-term exposure: chemical-resistant protective gloves (according to the specifications of VO (EU) No. 2016/425 and DIN EN 374).

· **Material of gloves**

Nitrile rubber, NBR

Recommended thickness of the material: ≥ 0.45 mm

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

· **Penetration time of glove material**

≥ 480 min

The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.

· **Eye/face protection**

Frame goggles with side protection (according to DIN EN 166:2001, Personal eye protection - Requirements).

· **Body protection:** Protective work clothing
